

# OSTEOPOROSIS

A bone density screening can help measure how strong the bones are. Weak bones can lead to a fracture. As we get older, our bones change and lose bone mass and develop poor bone quality.

Bone density is recommended for women age 65 years and over and for women that have been through menopause. Men can also develop osteoporosis and should get screened.

Bloomfield Health & Human Services is offering an

## Osteoporosis Screening – 10am to 12 Noon
